College Policy on Solid Waste Management

1. **Segregation of Waste:** The College will categorize waste into four types: biodegradable (wet waste), non-biodegradable (dry waste), e-waste, and chemical waste.
2. **Waste Collection:** There will be four designated dustbins for collecting these types of waste across the campus.
3. **Waste Disposal:** Offices, departments, and students must use their dustbins only for dry waste; other types of waste should be disposed of in the designated bins.
4. **Dry Waste Management:** All dry waste will be collected and transferred to municipal waste facilities.
5. **Biodegradable Waste:** Biodegradable waste will be deposited in composters for decomposition.
6. **E-waste Management:** E-waste will be sent to specific vendors when a sufficient amount has been collected.
7. **Plastic Disposal:** Plastics, if present, will be separated at the time of disposal to ensure proper recycling or management.

College Policy on Energy Conservation

1. **Lighting:** The college campus will use only energy-efficient LED tube lights and bulbs.
2. **Energy Saving Practices:** Offices, departments, and students are instructed to turn off lights and fans when not in use to conserve energy.
3. **Solar Rooftop Initiative:** Approval has been obtained to install a 10 kVA Solar Rooftop system, which will be implemented soon to harness renewable energy.
4. **Carpooling Initiative:** Teaching and non-teaching staff are encouraged to carpool for commuting to reduce fuel consumption and emissions.

College Policy on Water Conservation

1. **Water Management:** Separate tanks are maintained for drinking water and washroom supplies to ensure water quality and availability.
2. **Maintenance:** Water filters and coolers will undergo regular maintenance under an Annual Maintenance Contract (AMC).
3. **Cleaning and Harvesting:** The drinking water tank will be cleaned post the rainy season, and water from the rainwater harvesting tank will be used in washrooms and gardening.
4. **Water Conservation Practices:** All members of the college community are advised to close taps when not in use to prevent wastage.

College Policy on Green Campus

1. **Landscaping:** Flower beds and green belts will be established throughout the campus landscape, enhancing its aesthetic and environmental value.
2. **Tree Plantation:** Unused campus land will be dedicated to planting trees, promoting biodiversity, and reducing carbon footprint.
3. **Seasonal Plantation:** Plantation activities will be coordinated with forest and horticulture departments during the rainy and winter seasons to ensure optimal growth conditions.
4. **Campus Green Spaces:** The N.S.S unit will develop and maintain the N.S.S Vatika, while the Botany Department will oversee the Botanical Garden, fostering educational and ecological benefits.
5. **Community Engagement:** Teaching, non-teaching staff, and students will actively participate in maintaining greenery on campus through regular volunteering and educational initiatives.
6. **Composting:** Organic waste from the college composter will be utilized as compost for plantation activities, promoting sustainable soil management practices.

These policies aim to create a sustainable and environmentally conscious campus, promoting responsible waste management, energy efficiency, water conservation, and green initiatives among the college community.
